

**Nächste Generation Thermoprozesstechnik
Industriefofensysteme GmbH**

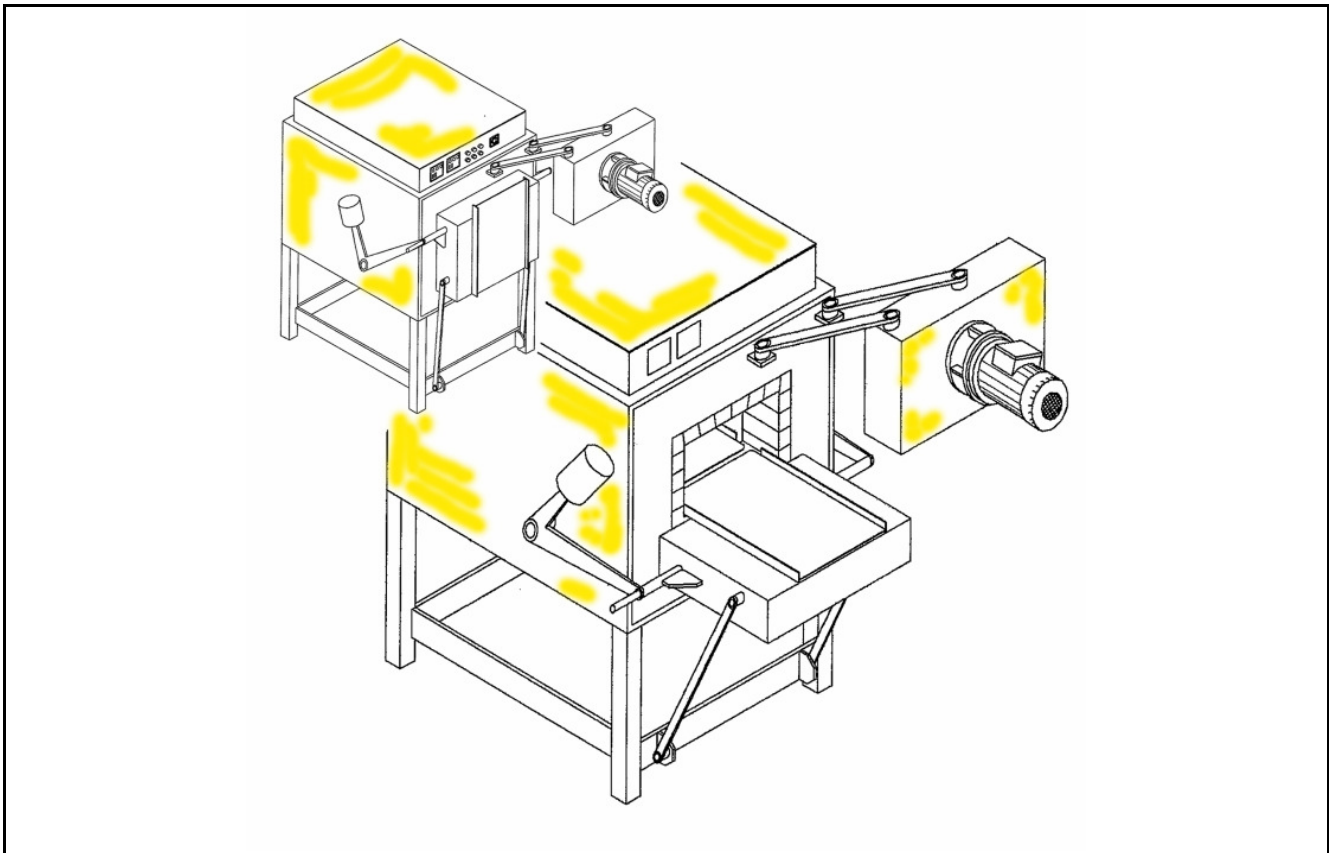

Thermo process technique and industrial furnace systems for the industry

- ACC_CON Technology, forced air circulation
- Temperature 950 °C and 1.300 °C
- Electro heating with controlled sections
- Charge up to 2.000 kg
- Insulation modules or inner brickwork
- Temperature control in the chamber and /or on object

➤ Product group:
Anneali**N.G.T.I.**

- **Standard series furnaces**
- **Custom made furnaces**
- **Special equipment**
